

LEGACY OF INNO VATION

 **VIRGO**[®]
ALUMINUM

FLAT ROLLED
PRODUCTS

Aluminium Coil

Our cold rolled coils not only have uniform and bright surface finishes, but also meet all international standards for dimensional tolerances and metallurgical properties. Other than our standard specifications, we can also supply customized products to cater to the customer's exact requirement.

End Use Applications: Architectural, Transport Body, Fan Blade, General Engineering, Marine, Printed Circuit Board Panel, Electrical & Electronics, Insulation, Ceiling Panels, Dish Antenna

Alloys	1050, 1060, 1100, 3003, 3105, 5005, 8011, 3004, 3005
Finish	Mill Finish
Thickness	0.12mm - 8.0mm
Width	650mm - 1525mm
Temper	F, H12, H14, H16, H18, H24, H26, H28, O
Packing	Standard, Wooden & Sea-worthy packing for export

Note : Custom Production Possible

WHY US?

Since our inception, our company operations are driven with the commitment to upholding the highest levels of customer satisfaction. Therefore, we have developed an approach towards an improvised business model which equips us to have a keen eye on the latest market trend.

Company Overview

Virgo Aluminium Limited was established in the year 1989 in Gujarat, India. We are a professionally managed manufacturer, exporter and supplier of aluminium products. We have varieties of products for our customers and clients. All our products are of premium grade. We endeavour to revolutionize in the industry by fabrication a wide gamut of quality products. The products of our company have gained us huge recognizance for its high strength, wear and tear resistance, flexibility, accurate dimension and durable finish. These products can be used for various applications in different sectors. We have successfully earned a huge client base.

About Us...

We introduce ourselves as a part of Virgo family, and have in the business of supply of Aluminium rolled products for the last 10 years, based in Gujarat, India.

We are an ISO 9001 and 14001 certified backed by a rigid Quality control systems involving the strictest in process controls and testing at every stage of its Rolling operations backed up by seasoned professionals from the Aluminium industry. Today we are confident of meeting the quality requirements of the various industries in domestic as well as international. We produce and supply materials as per IS 737, AA Standard, ASTM B209 & EN-European Standard.

We are regularly exporting our products to the USA, UAE, Portugal, Spain, Africa, Asia, Qatar, Australia, UK, Gabon, Cameroon, Ivory Coast, Tema, Colombia, Nigeria, Thailand, Bangladesh, Nepal etc. You can also visit our website www.virgoalu.com for getting all details and our company profile and brochure.

Color Coated Coils

Our pre-coated aluminium is a versatile offering with applications ranging from facade to roofing across various architectural and engineering use cases. Our color coated coil is the most preferred among the top ACP manufacturers globally. Apart from the high-quality aesthetics that our coated coils offer, they add immense value in enhancing durability and long-term performance of the building envelope against the harshest environmental conditions.

Technical Specifications

- All aluminium alloys and tempers
- Width from 900 mm - 1270 mm
- Thickness from 0.1 mm - 1.00 mm
- Coating types PE/RMP/HDPE/PVDF/FEVE up to 4 layers
- Both side coating compatible infrastructure
- All colors and gloss levels (RAL and Pantone)

Aluminium Composite Panels

Virgo Aluminium is one of the largest ACP Sheet Manufacturers based in India and offers premium quality ACP panels in a visually striking palette of colors and textures. Ideal for external cladding, interior application and signage, the panels by Virgo ACP help create visual aesthetics that enhance the appearance of any space. Highly durable, stain-resistant, and weatherproof, these ACP sheets are the epitome of our creativity and hard work.

Aluminium Sheets

Our cold rolled sheets not only have uniform and bright surface finishes, but also meet all international standards for dimensional tolerances and metallurgical properties. Other than our standard specifications, we can also supply customized products to cater to the customer's exact requirement.

End Use Applications: Architectural, Transport Body, General Engineering, Marine, Printed Circuit Board Panel, Electrical & Electronics, Insulation, Ceiling Panels, Caul Board

Alloys	1050, 1060, 1100, 3003, 3105, 5005, 8011
Finish	Mill Finish
Thickness	0.60 - 8.0mm
Width	850mm - 1500mm
Length	Upto 6 metres standard
Temper	F, H14, H16, H18, H24, H26, H28, O
Packing	Standard, Wooden & Sea-worthy packing for export

Note : Custom Production Possible

Aluminium Flooring & Stucco Embossed Sheets & Coils

Patterned sheets are primarily used for flooring as they are anti-skid due to treads. Our pattern sheets have a high strength to weight ratio, good welding and forming properties. We supply this product in two different patterns – Five Bar and Diamond. Apart from standard specifications, we can supply pattern sheets in customized alloys and sizes.

End Use Applications: General Engineering, Flooring Sheet for Bus, Trucks, Railways, etc.

Alloys	1100, 3003, 3105, 5005, 8011
Finish	Mill Finish
Thickness	0.60 - 8.0mm
Width	850mm - 1500mm
Length	Cut to order
Temper	F, H14, H16, H18, O
Packing	Standard, Wooden & Sea-worthy packing for export

Note : Custom Production Possible

Aluminium Roofing

We manufacture roofing sheets in mill finish as well as colored form with RMP, SDP and PVDF coating. Our roofing sheets are available in various profile shapes, such as circular corrugated and industrial troughed (trapezoidal). Aluminium roofing sheets are the preferred choice for roofing applications because they are light-weight, corrosion resistant and has a very high resale value compared with other roofing solutions like galvalume and asbestos roofing sheets.

End Use Applications: Industrial Sheds, Insulated Roofing, Wall Cladding, Residential Roofing.

Alloys	1100, 3003, 3105, 5005, 8011
Finish	Mill Finish
Thickness	0.45 - 1.22mm
Width	1044mm after profiling / As per order
Length	Cut to order
Temper	H16, H18, O
Packing	Standard, Wooden & Sea-worthy packing for export

Note : Custom Production Possible

Aluminium Foil Stock, SRC & Fin Stock

SRC foils and fin stock are used across critical segments, we ensure our products exceed the quality expectations of each of our customers. With high quality engineering, our foils are manufactured to the utmost precision standards.

End Use Applications: Semi-Rigid Containers, Fin Stock

	SRC	FIN STOCK	FOIL STOCK
Alloys	1050, 1100, 8006	1050, 1100, 8011	8011
Finish	BSB	BSB	Mill
Thickness	0.32mm-050mm	0.32mm-0.50mm	0.35mm and above
Width	200-950	290 - 450	900mm-1500mm
Temper	H24, O	H22, H24, H26, O	H14
Packing	Standard, Wooden & Sea-worthy packing for export		

Note : Custom Production Possible

Cable Tape

Our cable tape stock meets all domestic and international standards and is used by most of the major cable manufactures globally. Being made from pure ingots and processed through our latest equipment, our product have excellent UTS, elongation and length requirements that meet the needs of the cable industry.

End Use Applications: Electrical Cable Manufacturing

Alloys	1050
Thickness	1.30 - 3.0mm
Width	46mm (Min)
Temper	O
Coil (ID)	As per requirement after confirmation
Coil (OD)	1400 (Max) for thickness 1.30-1.90
Coil (ID)	1500 (Max) for thickness 2.00-3.00
Packing	Standard, Wooden & Sea-worthy packing for export

Note : Custom Production Possible

Multi-Slit Coils

Virgo aluminium multi-slit coils are very well suited to be used in heat exchangers and transformers. Made under our strict quality control systems and with cutting-edge equipment, our material meets all the domestic and international standards in terms of build-up, tolerances and other specifications.

End Use Applications: Heat Exchangers, Transformers.

Alloys	AA 1XXX, 3XXX, 8XXX, 5005
Thickness	0.20 - 1.00
Width	46mm and above
Coil (ID)	150 mm
Coil (OD)	1200 mm
Packing	Standard, Wooden & Sea-worthy packing for export

Note : Custom Production Possible
